

## LM711/LM711C Dual Comparator

### General Description

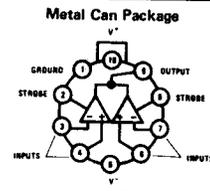

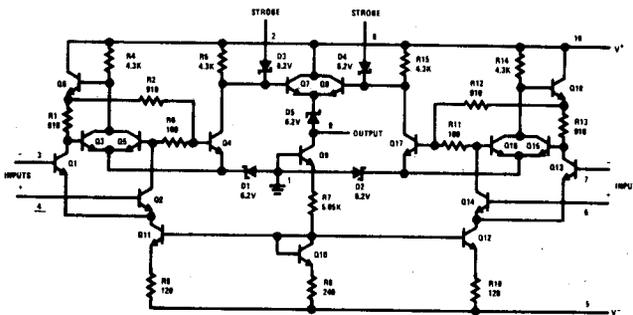

The LM711 series contains two voltage comparators with separate differential inputs, a common output and provision for strobing each side independently. Similar to the LM710, the device features low offset and thermal drift, a large input voltage range, low power consumption, fast recovery from large overloads and compatibility with most integrated logic circuits.

With the addition of an external resistor network, the LM711 series can be used as a sense amplifier for core memories. The input thresholding, combined with the high gain of the comparator, eliminates many of the inaccuracies encountered

with conventional sense amplifier designs. Further, it has the speed and accuracy needed for reliably detecting the outputs of cores as small as 20 mils.

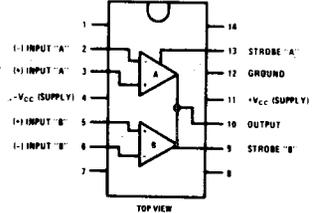

The LM711 series are also useful in other applications where a dual comparator with OR'ed outputs is required, such as a double-ended limit detector. By using common circuitry for both halves, the device can provide high speed with lower power dissipation than two single comparators. The LM711C is the commercial/industrial version of the LM711. With operation specified over a 0°C to +70°C temperature range.

### Schematic \*\* and Connection Diagrams

Note: Pin 5 connected to case.  
Order Number LM711H or LM711CH  
See NS Package H10C

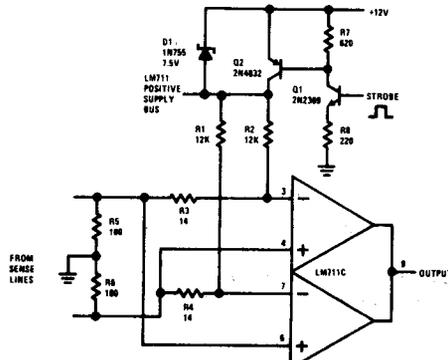

#### Dual-In-Line Package

Order Number LM711CN  
See NS Package N14A

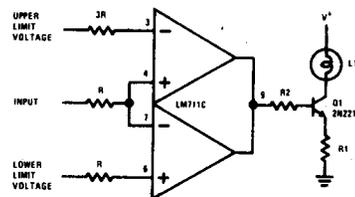

### Typical Applications\*\*

**Sense Amplifier With Supply Strobing for Reduced Power Consumption\***

\*Standby dissipation is about 40 mW.

#### Double-Ended Limit Detector With Lamp Driver

\*\*Pin connections shown are for metal can.

## Absolute Maximum Ratings

Positive Supply Voltage	+14V	Operating Temperature Range	$T_{MIN}$	$T_{MAX}$
Negative Supply Voltage	-7V	LM711	-55°C	to +125°C
Peak Output Current	25 mA	LM711C	0°C	to +70°C
Differential Input Voltage	±5V	Storage Temperature Range	-65°C	to +150°C
Input Voltage	±7V	Lead Temperature (Soldering, 10 seconds)	300°C	
Strobe Voltage	0 to +6V			
Internal Power Dissipation (Note 1)	300 mW
